SEED Process mapping as-is

The Support for Education, Empowerment and Development (SEED) programme is the Government of Grenada's flagship social assistance initiative. It provides monthly cash transfers to vulnerable households, with conditions linked to school attendance and health check-ups. SEED is managed by the Ministry of Social Development and delivered through coordination with the Ministry of Finance, financial institutions and Grenada's Cooperative Bank.

This is a current (as-is) mapping of the SEED Program, based on an actual "today" state, as of June 2025. The mapping goal is to identify and document existing problems, duplications and pain points; and highlight opportunities for automation and digitalization.
